SUMMARY

I build and run the program engines behind developer-facing marketing: workshop and event series, campaign playbooks, and the intake, cadence, and measurement that turn practitioner trust into pipeline. Journalist, then eight years of communications and program work at Google, then applied-AI builder; a live rundown is a program plan with zero slack.

Eight years at Google, the last two at Cross-Google Engineering (xGE), the horizontal org driving technical change across Google: built the communications-and-program function from zero for 1,000+ Principal, Distinguished, and Fellow engineers: the annual Sr. Tech IC Summit, quarterly forums, the peer-led xGE Connects workshop series, and a three-tier operating model with real intake, governance, and cadence.

I am the audience developer marketing has to convince: I build multi-agent systems daily, in public. **career-ops** runs 52 scheduled agents with budget caps and dead-man heartbeats under a unified spend cap; the same practitioner credibility carries a workshop stage.

FIT FOR MARKETING PROGRAM MANAGEMENT (DEVELOPER TOOLS)

- **Own the program spine end to end:** the annual Sr. Tech IC Summit (600+ Principal, Distinguished, and Fellow engineers), quarterly engineering forums (300+ each), and the peer-led xGE Connects workshop series, survey to stage.
- **Run live rooms under a hard clock:** a decade of live national news; a workshop calendar is a broadcast rundown, and rehearsal, timing, and recovery are muscle memory.
- **Hold credibility with practitioners:** two years building programs for 1,000+ Principal, Distinguished, and Fellow engineers, and I ship with the agentic tooling these programs teach.
- **Measure behavior, not traffic:** a content-effectiveness audit lifted self-service solvability 9.03%, roughly 10,670 fewer support tickets a year; define the behavior a program should change, then measure that.
- **Produce content at reach:** engineering talent-branding campaigns (1.7M+ YouTube views); AJ+'s day-of **explainer line** (proof-of-concept: 50M+ views).

EXPERIENCE

Internal Communications Lead

Google · Cross-Google Engineering (xGE) | June 2024 – Present

First dedicated communications hire for xGE; built the function from zero for a community of 1,000+ Principal, Distinguished, and Fellow engineers, and authored the three-tier operating model (intake protocols, editorial calendar, governance, campaign-execution playbook) the portfolio below runs on.

Senior-IC event and program portfolio

- **Problem:** The community needed a program engine, not ad hoc events and sends.
- **Action:** Owned the annual Sr. Tech IC Summit (600+ Principal, Distinguished, and Fellow engineers), quarterly engineering forums (300+ each), and xGE Connects, the peer-led workshop series, end to end: intake, speaker prep, rehearsal, staging, follow-up, plus the annual survey that shapes the community's roadmap.
- **Impact:** One repeatable operating rhythm; Q1-2026 Connects sessions, hosted by Google DeepMind engineers, drew record attendance.

Executive-communications **digital twin** (Gemini)

- **Problem:** VP communications required long review cycles to hold a consistent voice.
- **Action:** Built a Gemini agent around a codified voice "Constitution" plus a banned-phrase verification checklist.
- **Impact:** Cut review back-and-forth with the VP by about 70% (internal, self-measured).

Communications-triage agent (Apps Script + Gemini)

- **Problem:** High-volume comms intake consumed operator hours on low-complexity requests.
- **Action:** Built and deployed an autonomous three-prompt pipeline (triage, revise, escalate) with conditional knowledge-base loading and tiered routing.
- **Impact:** Designed to auto-handle roughly 60% of inbound (est.) and projected to recapture ~160 operational hours/year (est.); documented end-to-end and handed off with a full **operator runbook**.

Senior Communications & Content Strategist

Google · Corporate Engineering (TechStop) | April 2018 – June 2024

Communications and content for Google's internal IT org and its global help desk (TechStop); also ran the engineering talent-branding portfolio.

Engineering talent-branding video portfolio

- **Problem:** Engineering hiring needed stories, not job listings.
- **Action:** Produced recruitment campaigns and talent-branding content end to end, running field shoots with vendor crews.
- **Impact:** 1.7M+ YouTube views across the portfolio.

2023 content-effectiveness audit

- **Problem:** Self-service content was leaving solvable tickets on the table.
- **Action:** Designed the measurement framework and rewrote the highest-traffic, lowest-solve articles.
- **Impact:** Lifted self-service solvability 9.03%, roughly 10,670 fewer tickets a year.

Day-One technical onboarding overhaul

- **Problem:** Live orientation could not keep pace with Google's hiring.
- **Action:** Rebuilt it into a self-service curriculum a new hire could complete without a facilitator.
- **Impact:** Delivered to 75,000+ new hires at an 88% CSAT score.

PROJECTS

Code public at github.com/mitwilli-create.

career-ops · Extended an open-source pipeline into a cost-governed multi-agent system: multi-LLM council with adjudication, 52 scheduled agents, MCP servers, live operations dashboard. CI-green; public on GitHub.

content-ops · A multi-agent content engine: one idea becomes platform-native pieces through nine dated platform playbooks and four audience profiles, gated by a deterministic voice check with a hard human-in-the-loop publish step.

picture-lock · Seven-stage AI film pipeline: script in, produced and captioned short out; \$8.26 of logged cost, every API call in a committed run manifest.

EARLIER CAREER: LIVE NATIONAL NEWS (2007 – 2018)

The engine of live news is the engine of field and event marketing: a live room, a hard clock, and a skeptical audience, every day at air time.

- **AJ+, Senior Producer (2016 – 2018):** Led 10+ producers; designed a day-of explainer line (proof-of-concept: 50M+ views) that doubled as a **talent pipeline**: three producers coached into on-camera principals with Emmy and Webby wins.
- **CNN, Writer / Producer, "New Day" (2016):** Wrote and produced morning-show segments through the 2016 election cycle.
- **Fusion (ABC News / Univision), Senior Producer, "America With Jorge Ramos" (2013 – 2015):** Owned daily line-production on the primetime flagship through a 179% viewership-growth window (40M households).
- **HuffPost Live, Segment Producer (2012 – 2013):** Produced through the award-winning launch era (Mashable "Biggest Innovation in Media," 2012; Webby, 2013).
- **Al Jazeera English "The Stream" · CGTN America (2010 – 2012):** Founding-team Associate Producer on the network's social-first live show; launch night (250M households) pivoted to the **bin Laden** raid.

EDUCATION

BA, Journalism | Indiana University Bloomington

CERTIFICATIONS

AI Fluency · Claude 101 · Agent Skills · Model Context Protocol · Skill Builder (Opus cohort) | Anthropic | 2026

SKILLS

Marketing Program Management: campaign planning and execution, GTM program management, developer and field marketing, workshop and event program management, launch cadence and calendar ownership, intake and prioritization frameworks, program-ROI and metrics design, stakeholder management.

Developer & Technical Marketing: technical-audience communications, AI-native developer-tool positioning, community engagement, workshop curriculum design, enterprise enablement content.

AI / Agents: production LLM agents (Apps Script + Gemini, Node.js), multi-agent orchestration, Model Context Protocol (MCP), Claude Code skills, eval and regression infrastructure, prompt engineering.
