Selected work:

#FreeAhmed (April 2026): helped free detained journalist Ahmed Shihab-Eldin, released in ten days and acquitted on the central charge

Google engineer profiles + 50M-view **measles explainer** (thestorytellermitch.com/select-works)

Writing room with verbatim published scripts (thestorytellermitch.com/writing)

SUMMARY

Content producer and editorial lead who tells the story of technical work in whatever format lands: video, live events, newsletters, podcasts, artifacts. Finds the story inside an organization's people and culture, picks the format that serves it, owns production end to end, and builds the editorial system that holds the bar when the volume grows.

Eight years at Google translating engineering work into stories people actually engage with: talent-branding video with 1.7M+ YouTube views, executive communications for the CIO, and two production LLM agents that draft high-stakes communications in a principal's own voice under a codified editorial standard.

The newsroom decade is the home turf: founding team of Al Jazeera English's social-first live show, line production on Fusion's primetime flagship, and an **explainer line** at AJ+ whose proof-of-concept hit 50M+ views.

FIT FOR CONTENT PRODUCER & EDITORIAL LEAD ROLES

- **Finding and building narratives:** Designed the AJ+ day-of explainer line to find the story inside the day's news and ship it same day; the proof-of-concept hit 50M+ views and the format became permanent. At Google, turned software and application engineering work into a public talent-branding video portfolio. At HuffPost Live, originated stories, not just produced them.
- **Producing across mediums, owned end to end:** Live broadcast, social video, explainer series, newsletters, in-person events (600+ attendee summit, quarterly forums), and an AI video pipeline: script in, produced short out with audio end to end (narration, score, sound design). Cut and mixed my own pieces at AJ+; owned the daily rundown at CCTV America.
- **Editorial standards as systems, not vibes:** A codified voice "Constitution," a banned-phrase checklist, a six-axis voice-quality rubric (**voice-os**), and a triage / revise / escalate review workflow; quality holds without the editor in every loop.
- **Editorial talent development:** Three AJ+ producers I coached became on-camera principals with recognition of their own, including a Daytime Emmy and a Webby.
- **High-trust, time-sensitive environments:** Executive communications for Google's CIO; a **digital-twin agent** drafting for a VP in the VP's own voice; sustained **Scientology**-defector coverage under an active litigation posture with no retractions.
- **Moving extremely quickly and fluidly:** When **Nelson Mandela** died, rebuilt the rundown overnight and line-produced Fusion's 44-minute live primetime breaking-news special, integrating ABC News packages, White House audio, and four consecutive live phone experts under genuine breaking-news conditions.
- **Telling stories in unexpected ways:** Pioneered social-data journalism on The Stream, turning a Twitter eyewitness's follower trajectory into a live on-air data story the night **bin Laden** died.
- **AI-assisted production:** I built two production LLM agents at Google, plus **broll-pipeline** and **content-ops** on my own time; case studies at thestorytellermitch.com/projects. The rule I build by: AI does the mechanical work, the editorial cut stays human. Anthropic-certified (AI Fluency, Claude 101, Agent Skills, MCP, Skill Builder).

EXPERIENCE

Internal Communications Lead

Google • Cross-Google Engineering (xGE) | June 2024 – present

Communications lead for the horizontal org that drives technical change across Google, serving 1,000+ Principal, Distinguished, and Fellow engineers; designed the org's three-tier communications operating model, on which the annual summit (600+ attendees), quarterly forums, and the Distinguished / Principal Engineering newsletters run.

- **Executive-communications "digital twin" (Gemini agent):** Built and deployed a production Gemini agent loaded with a "Constitution" of voice rules plus a banned-phrase verification checklist; drafts high-stakes VP communications in a consistent voice and cut review back-and-forth with the VP by about 70% (internal, self-measured).

- **Communications-triage agent (Apps Script + Gemini):** Built and deployed an autonomous triage agent for the comms inbox, documented end to end and handed off with a full **operator runbook**; designed to auto-handle ~60% of inbound requests without escalation (est.) and projected to recapture ~160 operator hours a year (est.).
- **xGE Connects, peer-led workshop series:** Designed and ran a peer-led speaker series (senior engineers teaching the tier below) plus the annual survey that shapes the community's roadmap; Q1-2026 sessions, hosted by Google DeepMind engineers, drew record attendance.

Senior Communications & Content Strategist

Google · Corporate Engineering (TechStop) | April 2018 – June 2024

Owned the communications and content (documentation, self-help, onboarding, video) for Google's internal IT org and its global help desk; a 2023 content audit lifted self-service solvability 9%, roughly 10,670 fewer tickets per year.

- **Engineering talent-branding video portfolio:** Produced recruitment campaigns, interview-prep and hiring videos, and talent-branding content, running field shoots end to end with vendor crews (shooters, director of photography, AV, sound); 1.7M+ YouTube views across the portfolio.
- **Executive communications for the CIO:** Wrote executive communications for then-CIO Ben Fried, translating dense technical priorities into leadership-ready narrative and becoming a trusted ghostwriting voice for Corporate Engineering leadership.
- **Self-service onboarding curriculum:** Overhauled instructor-led Day-One technical orientation into a self-service curriculum delivered to 75,000+ new hires at an 88% CSAT score.

EARLIER CAREER: LIVE NATIONAL NEWS (2010 – 2018)

The engine of live news is the engine of internal storytelling: the message lands the first time, under deadline, in the voice of the person whose name carries it.

- **AJ+, Senior Producer (2016 – 2018):** Led 10+ producers on a social-video channel reaching 500M weekly views; designed a day-of explainer line whose proof-of-concept hit 50M+ views and became permanent, and which doubled as a **talent pipeline**.
- **CNN, Writer / Producer, "New Day" (2016):** Wrote and produced morning-show segments through the election cycle; adapted broadcast segments for social redistribution.
- **Fusion (ABC News / Univision), Senior Producer, "America With Jorge Ramos" (2013 – 2015):** Owned daily line-production on the primetime flagship through a 179% viewership-growth window (40M households); field-produced live from Hong Kong's **Umbrella Revolution**.
- **HuffPost Live, Segment Producer (2012 – 2013):** Produced through the award-winning launch era (Mashable "Biggest Innovation in Media," 2012; Webby, 2013).
- **Al Jazeera English "The Stream" · CCTV America (2010 – 2012):** Founding-team Associate Producer on the network's social-first live show; then owned the daily rundown at CCTV America's DC bureau.

PORTFOLIO AND PROJECTS

Portfolio · thestorytellermitch.com/writing: the verbatim published AJ+ measles explainer script, 17 authored longform story pages, and redacted-verbatim Google work samples including the comms-triage operator runbook.

broll-pipeline · Seven-stage script-to-short video pipeline (Node + ffmpeg, ElevenLabs stack): AI narration, composed score, sound design, generated shots, multilingual dub. The live demo ships a 53-second captioned cut with a Spanish dub at \$14.20 all-in, every API call logged to a run manifest committed in the public repo at github.com/mitwilli-create/broll-pipeline.

content-ops · A multi-agent engine that adapts one story to each of nine platforms' native formats through deterministic voice gates, with a person pressing send; case study at thestorytellermitch.com/projects.

voice-os · Six-axis voice-quality rubric with a codified voice "Constitution" and banned-phrase checklist, calibrated on a multi-million-word corpus; built as a coaching aid that surfaces voice deltas back to the writer.

EDUCATION

BA, Journalism | Indiana University Bloomington

CERTIFICATIONS

AI Fluency · Claude 101 · Agent Skills · Model Context Protocol · Skill Builder (Opus cohort) | Anthropic | 2026

SKILLS

Content, Media & Internal Communications: video and live-broadcast production, script-to-short AI pipelines, social-first format design, run-of-show production, on-camera talent coaching, executive-voice drafting and ghostwriting, internal-comms strategy at engineering scale, editorial standards and review workflows, voice and tone calibration.

Applied AI: agent design (Apps Script + Gemini, Node.js), AI narration and dubbing (ElevenLabs), Claude Code / MCP, prompt engineering.
