SUMMARY

Enablement lead who treats adoption as a legibility and trust problem, not a mandate problem. The arc runs journalist to communications strategist to applied-AI builder: translating what a system does into terms the people who must trust it can verify.

Eight years at Google: six reaching a global workforce, two serving its 1,000+ most senior engineers while building the AI tools myself, inside the program I ran at Cross-Google Engineering (xGE).

Before Google, a decade of live national news, an adoption environment with zero patience for ill-fitting tools. Resistance is a design signal, not a people problem.

SELECTED BUILDS

- **tax-verification-agent** · Citation-gated verification on Claude over a four-layer IRS knowledge base; every claim cites its source or surfaces as a placeholder. Caught a ~\$19K multi-state error that filing software pre-filled and defended as correct. Public on GitHub.
- **broll-pipeline** · Seven-stage script-to-short creative-AI pipeline in Node and ffmpeg on the ElevenLabs stack; every API call logs to a committed run manifest. Live demo: a 53-second creative-directed short plus Spanish dub, \$14.20 all-in with every retake logged. Public on GitHub.
- **career-ops** · Cost-governed multi-agent system, dozens of automations operated daily: multi-LLM council with dealbreaker adjudication, autonomous regression-guard and bug-resolver pipeline, Claude Code skills and MCP servers, live operations dashboard. CI-green, test-covered.
- **Executive digital twin (Google xGE)** · Gemini agent with a voice "Constitution" plus a banned-phrase verification checklist; drafted high-stakes VP communications, cutting review back-and-forth with the VP by about 70% (internal, self-measured). voice-os, its public personal descendant, is on GitHub.

FIT FOR AI ENABLEMENT / TRANSFORMATION LEAD

- **Adoption against skepticism:** Handed the comms-triage agent to a non-builder operator; the trust moves were a full runbook (prompt architecture, escalation paths, failure modes) and human-in-the-loop authority on every High-touch classification, leaving a system the operator can run and extend without me.

EXPERIENCE

Internal Communications Lead

Google • Cross-Google Engineering (xGE) | June 2024 – Present

Communications lead and program manager for the horizontal org driving technical change across Google.

Executive-communications digital twin (Gemini)

- **Problem:** VP communications required long review cycles to hold a consistent voice.
- **Action:** Built a Gemini agent with a voice "Constitution" and banned-phrase verification checklist.
- **Impact:** Cut the VP's review back-and-forth by roughly 70%.

xGE Connects, peer-led technical workshop series

- **Problem:** Senior engineers' expertise was not reaching the tier below repeatably.
- **Action:** Designed and ran the peer-led speaker series plus the annual roadmap survey.
- **Impact:** Q1-2026 sessions, hosted by Google DeepMind engineers, drew record attendance.

Approvals governance overhaul

- **Problem:** Cross-org technical mandates stalled without a clear approvals framework.
- **Action:** Authored the Approvals User Guide, Approvals Matrix, and Roles & Responsibilities framework.
- **Impact:** Drove named cross-org mandates (Keystore Rotation, Memory Safety TRR) to approval.

Communications-triage agent (Apps Script + Gemini)

- **Problem:** Senior-IC comms intake consumed operator hours on low-complexity requests.
- **Action:** Built and deployed a three-prompt pipeline (triage, revise in Smart Brevity, escalate) with conditional knowledge-base loading and tiered routing.
- **Impact (design targets):** Designed to auto-handle roughly 60% of inbound requests without escalation (est.), projected to recapture ~160 operational hours/year (est.); documented and handed off with a full operator runbook.

MEJ (My Engineering Journey), AI mentorship-matching agent

- **Problem:** Manual mentorship matching ran ~3 hours per match and capped capacity.
- **Action:** Prototyped the agent and app as lead PM and architect: Python matching engine, Gemini prompt-chaining, security guardrails.
- **Impact (design targets):** Designed to cut per-match time to ~20 minutes and lift half-year capacity from ~15 to 50 matches.

Senior Communications & Content Strategist

Google · Corporate Engineering (TechStop) | April 2018 – June 2024

Owned communications and content for Google's internal IT org and its global help desk; also ran the engineering talent-branding portfolio across video and editorial (1.7M+ YouTube views).

Day-One onboarding overhaul

- **Problem:** Live instructor-led technical orientation could not keep pace with Google's hiring.
- **Action:** Rebuilt it into a self-service curriculum a new hire completes without a facilitator.
- **Impact:** Delivered to 75,000+ new hires at an 88% CSAT score.

Q1-2020 global remote-work shift

- **Problem:** The overnight shift to remote forced a global workforce to self-provision hardware and tools.
- **Action:** Directed the communications, content, and logistics-support strategy for the transition.
- **Impact:** Self-provisioning efficiency rose 80% the following quarter.

2023 self-help content audit

- **Problem:** Engineers opened help-desk tickets for problems the documentation should have solved.
- **Action:** Audited the self-help corpus and rewrote the highest-traffic, lowest-solve articles.
- **Impact:** Self-service solvability up 9.03%, roughly 10,670 fewer tickets per year.

EARLIER CAREER: LIVE NATIONAL NEWS (2010 – 2018)

- The engine of live news is the engine of enablement: adoption earned through legibility and trust, one broadcast at a time.
- **AJ+, Senior Producer (2016 – 2018):** Led 10+ producers; designed a day-of explainer production line (proof-of-concept: 50M+ views) that doubled as a talent pipeline: three producers I coached became on-camera principals with Emmy and Webby wins.
 - **Fusion (ABC News / Univision), Senior Producer, "America With Jorge Ramos" (2013 – 2015):** Owned daily line-production on the primetime flagship through a 179% viewership-growth window (40M households).
 - **HuffPost Live, Segment Producer (2012 – 2013):** Produced through the award-winning launch era (Mashable "Biggest Innovation in Media," 2012; Webby, 2013).
 - **Al Jazeera English "The Stream" · CCTV America (2010 – 2012):** Founding-team Associate Producer on the network's social-first live show; launch night (250M households) pivoted to the bin Laden raid and pioneered social-data journalism.

EDUCATION

BA, Journalism | Indiana University Bloomington

CERTIFICATIONS

AI Fluency · Claude 101 · Agent Skills · Model Context Protocol (March 2026) · Skill Builder, Opus cohort (May 2026) | Anthropic

SKILLS

Program, Enablement & Communications: AI enablement and adoption, internal training design and delivery, change-management programs, governance and approvals frameworks, metrics design, internal-comms strategy at engineering scale, executive communications, voice and tone calibration.

AI / Agents: agent design (Apps Script + Gemini, Node.js), LLM orchestration, multi-agent systems, Model Context Protocol (MCP), Claude Code skills, prompt engineering, eval / regression infrastructure, citation-gated RAG.
